

We'll Get Through This

*Times are so terrible
Almost unbearable
Who isn't scare-able now?
This is the trend of things
Seems there's no mend of things
Is this the end of things? Pow!
Dame Fortune may amaze us with each blow
But that shouldn't faze us, for I know—*

We'll get through this
We will be okay
We'll get through this
Tomorrow is another day
Things may be just as dark as they can be
But after night comes the morning light—just you wait and see!
We'll get through this!

They say the darkest hour
Is just before the dawn
Watch the far horizon
For the lights to come on!
We'll get through this!

We'll get through this
And make it farther down the line
We'll get through this
I know that things will turn out fine
This will not be, I swear, our final stand
Any day we'll be up and away into that promised land—
We'll get through this!
